Financial accounting is charged with the primary responsibility of external reporting. The users of information generated by financial accounting, like bankers, financial institutions, regulatory authorities, government, investors, etc. want the accounting information to be consistent so as to facilitate comparison. Therefore, financial accounting

~~INTRODUCTION TO ACCOUNTING~~

An Introduction to Financial Accounting by Margaret D'Arcy, 9781912350285, available at Book Depository with free delivery worldwide.

This textbook, originally by D. Annand and H. Dauderis, was intended for a first course in introductory financial accounting. It focuses on core introductory financial accounting topics that match pre-requisite

requirements for students advancing to Intermediate Financial Accounting. A corporate approach is utilized versus beginning with a sole proprietorship emphasis and then converting to a corporate approach; this consistency throughout the book reduces confusion for the introductory student. This most recent revision by D. Marchand converted the text from IFRS to reflect the Generally Accepted Accounting Principles of the United States (U.S. GAAP).

The new seventh edition of 'Introduction to Financial Accounting' has been fully revised and updated to reflect the very latest developments in this dynamic field and offers contemporary and comprehensive coverage of Financial Accounting today.

The fully revised and updated Third Edition of this textbook provides an accessible introduction to accounting for students coming to the subject for the first time. It embraces the basic techniques and underlying theoretical concepts in accounting and shows how these are applied in various circumstances. This New Edition incorporates major changes which improve and update the previous edition. It can be easily used by students working on their own, as well as in a classroom environment. It provides: - Fully illustrated & worked examples - Student Activities - End of chapter questions, many of which have been taken from major accounting examination bodies. -The solutions to all activities are given at the end of each chapter, and answers to the end of chapter questions are also supplied. Introduction to Accounting is an essential textbook for undergraduate accounting students. It is designed to meet the needs of both the non-specialist and those intending to specialise in accounting at undergraduate and also postgraduate levels. The Solutions Manual will be available via the SAGE website.

Peter Scott's Introduction to Financial Accounting provides a thorough but accessible and engaging introduction to the subject for first year students. This highly practical textbook uses a multitude of worked and real life examples, supportive learning features, crystal clear explanations, and extensive online resources (all fully integrated with the book) to guide students towards a confident understanding of the fundamentals of financial accounting. Scott's lively writing style sets the numerical content within an easy-to-follow narrative, and the real life relevance of each tool or technique is explained at every turn. All key areas of first year financial accounting courses are covered to provide a solid foundation for more advanced modules, with two chapters and an extensive online case study dedicated to the important topic of double-entry bookkeeping. The book's online resources include a wealth of materials which can be downloaded into a university's local VLE. The student resources include: - Interactive Multiple Choice Questions for revising key topics; - Numerical exercises for practising the calculation of accounting information from given sets of data; - 'Go back over this again' features containing a mix of further examples, written exercises, true or false questions, and annotated accounting information to help consolidate learning and revise or revisit concepts; - 'Show me how to do it' videos that provide practical demonstrations of dealing with more complex accounting tasks; - Web links for primary source material and articles through which readers can learn more about the companies and organizations discussed in the book. Lecturer resources include PowerPoint slides, examples and solutions, and hundreds of ready-to-use multiple-choice questions, all arranged by chapter. Lecturers can choose to make the online materials available to their students via Dashboard, a learning and assessment tool which provides sophisticated analytics for student achievement and engagement with the resources, also facilitating discussions and course updates.

This book is a self-study guide written for someone who wishes to teach themselves basic financial accounting. It is based on a course by the same author that has been successfully completed by thousands of students worldwide. It explains concepts in simple language with illustrative examples, provides review questions and quizzes after each chapter and section, and contains two full-length practice exams at the end of the book. This book compares and contrasts US GAAP and IFRS for every topic covered in the book.

This is an introductory level text for students undertaking accounting or business studies that offers a foundation to financial accounting. An interactive approach has been adopted to integrate the theory with practical situations.
