Quantum physics is so pivotal in modern physics that some aspects of it will be studied in at all three levels of study in the BSc (Hons) Physics course. This level 4 module will introduce the problems with classical physics and the need for a paradigm change, how this was made through the concept of a wavefunction and its associated Schrödinger equation.

monumental address, given to the International Congress of Mathematicians in Paris in 1900, David Hilbert, perhaps the most respected mathematician of his time, developed a blueprint for mathematical research in the new century.

The book contains a detailed account of numerical solutions of differential equations of elementary problems of Physics using Euler and 2nd order Runge-Kutta methods and Mathematica 6.0. The problems are motion under constant force (free fall), motion under Hooke's law force (simple harmonic
