Openamip Software~~
OpenAMIP is an IP based protocol that facilitates the exchange of information between an Antenna Controller Unit and a satellite router. It allows the router to command the antenna and enables the use of Automatic Beam Switching (ABS), which transfers connectivity from one satellite beam to the next as a vessel passes through multiple footprints.

OpenAMIP Solution Overview
On controllers that have the OpenAMIP software option, there will be an additional dropdown to allow the user to configure the modem listen port. The default modem listen port is shown in the image below. The modem will then need to be configured to talk to the ACU at the ACU IP address and modem listen port.
